

PAPER SPIDER

instructions:

- (1) Trace and cut ONE spider body circle.
- (2) Cut into the circle along the dotted line. Fold into a cone shape and staple or glue in place.
- (3) Cut out EIGHT skinny rectangle strips. To create spider's legs, accordion fold strips roughly along gray lines shown on template.
- (4) Staple or glue the legs to the underside of the spider's body, roughly at the spots marked with an "x" on the template.
- (5) If you wish to hang your spider, poke a hole through the point of the spider body and thread through yarn or string. Tie in a knot on the underside to secure.
